

Object-oriented Analysis & Design with UML Project

GROUP MEMBERS (1/1): Yoke NGASSA

PROJECT DESCRIPTION:

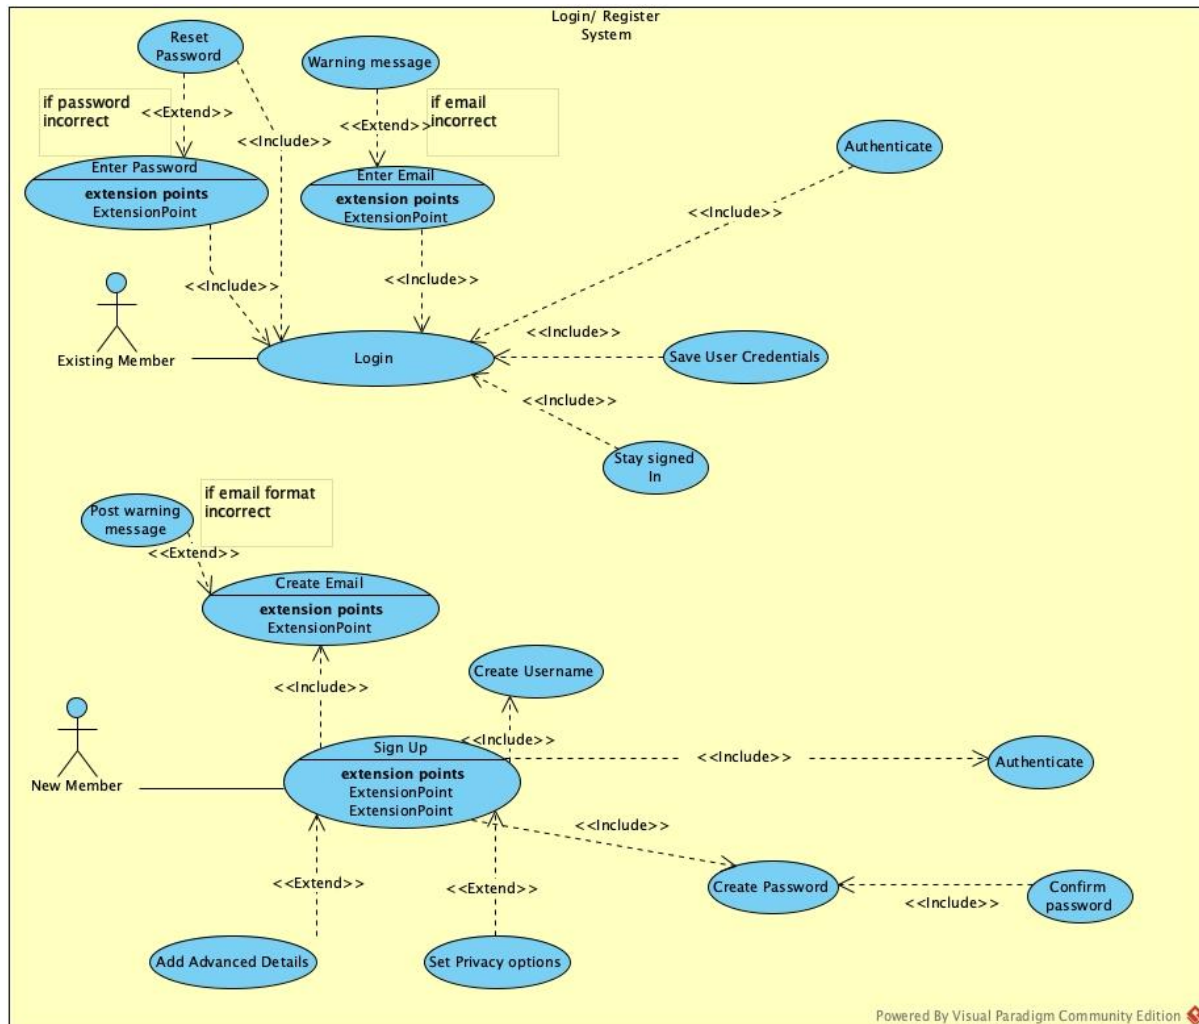

This anime database is a haven for anime enthusiasts. Users can browse into an extensive catalog of anime series and movies, browse beloved character profiles, and relish memorable quotes that have captivated anime lovers.

What sets this platform apart are its interactive features:

- Recommendation System: Discover new anime tailored to your preferences.
- Discussion Forums: Engage with fellow fans in lively discussions.
- Rate and Review: Rate and review anime/manga to your liking.
- Catalog Browsing: Have fun interacting with anime characters through chatbots, games, and quizzes.
- Add To Watchlist: Add several anime/manga to your watchlist, and customize your user experience.
- User-Generated Content: Contribute your fan art, fan fiction, or cosplay photos to the community.
- User Feedback and Content Submission: Share your thoughts, report issues, and even submit your favorite anime/manga for inclusion.
- User Stats: Keep track of your viewing history and engagement on the platform.

Whether you're a seasoned anime fan or a newcomer, this platform is your gateway to the anime universe, offering an array of features to enhance your anime experience.

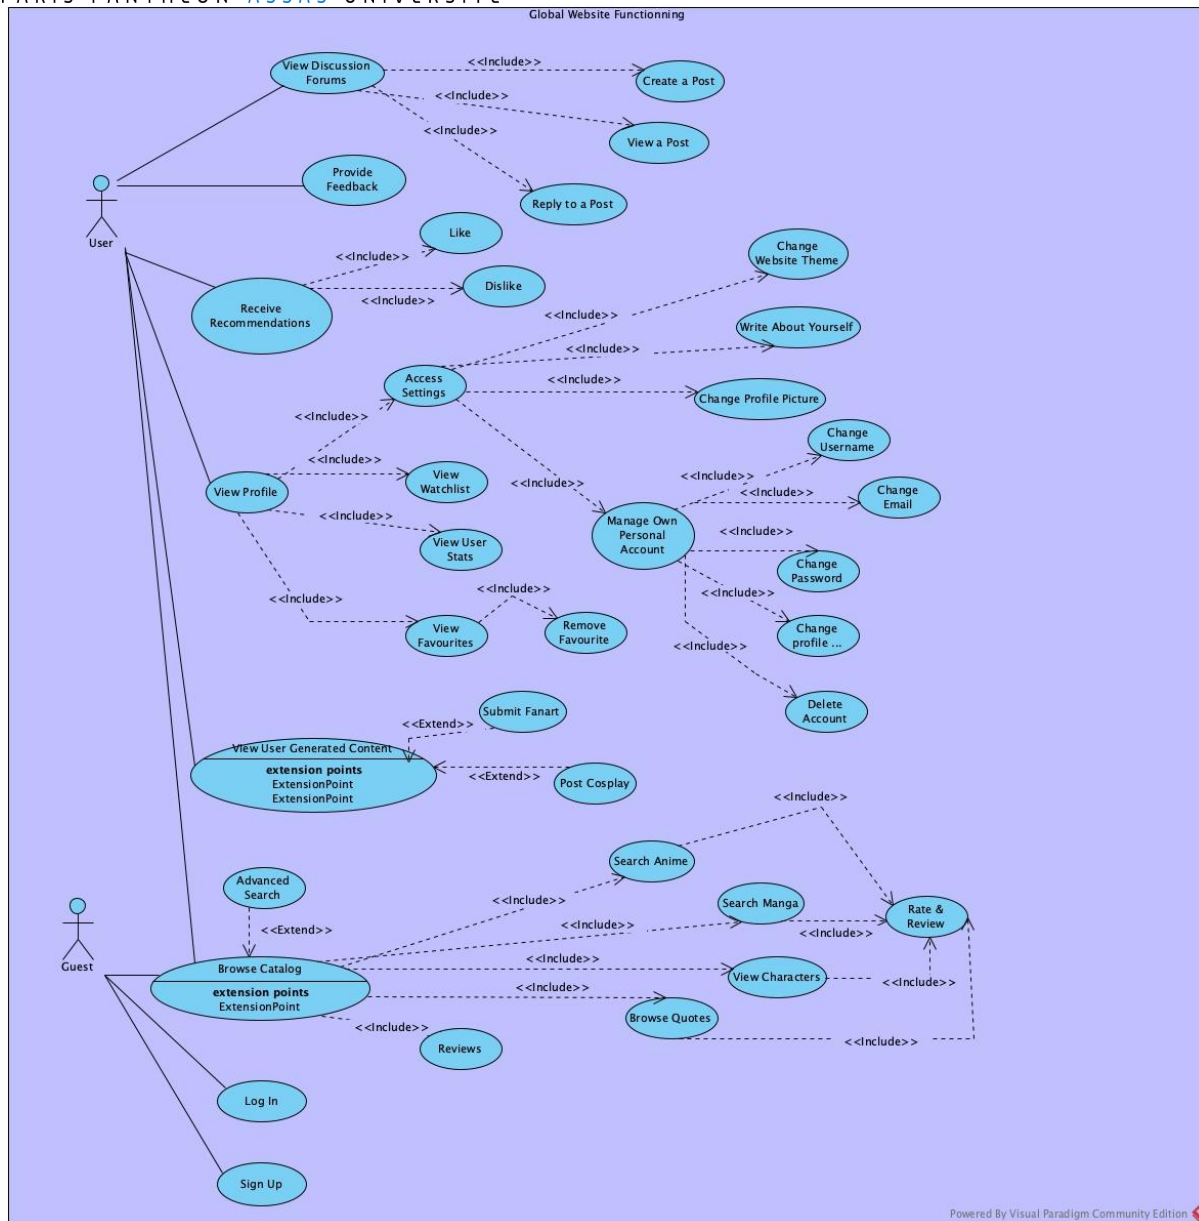

USE CASE DIAGRAMS:

Use-Case Diagram #1
User Authentication System

This use case diagram focuses specifically on the user authentication process, user login and registration. It was created to highlight the steps and interactions involved in authenticating users. The conditional behaviors, such as "Reset Password," are included to address specific scenarios where users may need to reset their passwords. This diagram clarifies the conditional logic behind user authentication, to emphasize the importance of security and access control.

Use-Case Diagram #2
Global Website System

This use case diagram illustrates the key interactions and functionalities of the website. It was designed this way to provide a clear overview of how an existing member and a guest interact with the system and the core use cases.

GANTT DIAGRAM:

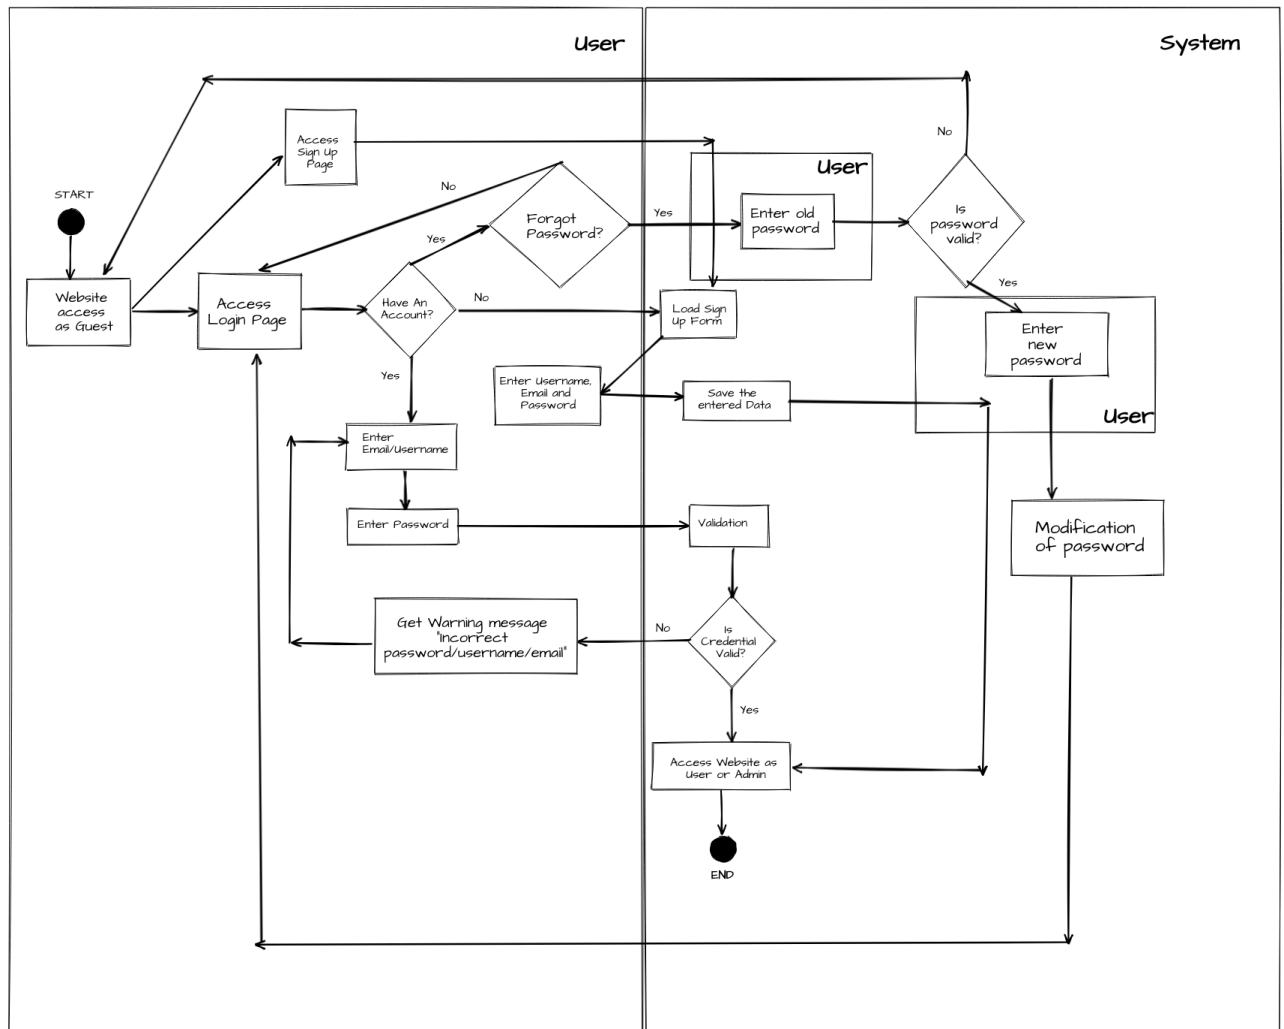

Gantt Diagram #1

This Gantt diagram outlines the project plan for the anime website (YourAnimeHub) development. It provides a visual timeline of project phases and tasks, which will help in project management and progress tracking. The diagram goes from October 1st 2023 to December 31st 2023, knowing that the real ending date of the project is December 15th 2023. Tasks durations are estimated.

- Login Wireframe

The wireframe shows a login page for 'YourAnimeHub'. At the top, there's a navigation bar with a logo, 'HOME', 'BROWSE', 'LOGIN', and 'SIGN UP' buttons. The main content area is titled 'Log In YourAnimeHub' and contains fields for 'Email' and 'Password', each with an icon (envelope and eye). Below these are a 'Remember me' checkbox and a 'Forgot Password?' link. A 'Log IN' button is centered below the form. At the bottom of the form, it says 'Don't have an account? Register'. The footer section includes a logo, social media links (GitHub, Discord, Twitter, Facebook), and other links (Recommend, Terms & Privacy, Sitemap, Contact). The footer text reads: 'YourAnimeHub © 2023 - Designed by YOKE NGASSA - All Rights Reserved'.

Wireframe #1

- Register Wireframe

The wireframe shows a registration form for 'YourAnimeHub'. The form is centered on the page and includes fields for Username, Email, Password, and Confirm Password. It also has a checkbox for 'I agree to the terms & conditions' and a 'REGISTER' button. Below the button is a link for 'Already have an account? Register'. The page layout includes a header with a logo, navigation links (HOME, BROWSE), and login/signup buttons. The footer contains social media links, other links, and a copyright notice.
